

At Software Toolbox our wide ranging expertise and quality products, backed by responsive support, come together to maximize your industrial software results.

1000's of global customers served

Our commitment to you:

Deliver: well designed, cost-effective, off-the-shelf software products that reduce engineering time, add functionality, and enhance automation project results.

Help: from project conception through completion, by proposing solutions which utilize and build on your existing investment; by providing technical support for our products so you can achieve maximum results.

Partner: by building a long term business relationship, working as a team to address current and future challenges, invested in joint success.

Your success is our success.

We've done this by listening to our customers.

Since our founding in 1996, we have assembled a long list of satisfied customers from global companies who depend on our products, service, and commitment.

End Users know their standards for PLC, HMI, DCS, MES and ERP don't cover everything. They depend on Software Toolbox's products to solve problems, add value and interoperate reliably with their standards.

Systems Integrators know we uniquely address a wide range of software needs with innovation and support that minimizes field startup and commissioning time.

OEMs leverage Software Toolbox products to increase the value of their total offering. Our development software helps build engaging machine user interfaces. Our connectivity software links their machines to end user automation systems.

International Automation Suppliers recommend Software Toolbox to the End Users, OEMs, and Systems Integrators that have standardized on their offerings, and many have even embedded our technology into their products.

Independent Software Developers depend on Software Toolbox's support, documentation, sales, and marketing expertise to facilitate a focus on what they do best—creating superior off-the-shelf software.

By listening to your goals, Software Toolbox focuses on maximizing your return on automation software investments.

Let's talk—What is it you're trying to accomplish?

Thank you very much for the support and fast reply. It would be great if we had this kind of customer service here in Finland.

~ Jari Pelto, Stora Enso, Finland

We have been very pleased with our relationship with Software Toolbox. Their professionalism, technical expertise, marketing expertise and speed of response has impressed us, resulting in a profitable business relationship with Software Toolbox.

~ Ralf Leinen, Siemens Energy & Automation

OUR CUSTOMERS

OUR PRODUCTS

OUR SERVICE

OUR COMMITMENT

We selected the OPC Data Logger from **Software Toolbox** as it was based on the **OPC standard** and was **OPC Certified**. The OPC Data Logger was easy to use due to built-in wizards and did not require specialized training. The built-in event logs and diagnostic tools allowed for easy troubleshooting. The service provided by the **support department was exceptional**.

~William Goodman, Molding International

100's of products

When we say we have solutions, we mean business.

We have worked with thousands of customers in every major industry. We have solved automation challenges, from simple to complex.

There is no "one-size fits all" in off-the-shelf automation software. Yet the total cost of ownership of custom solutions is often prohibitive. Knowing when to use one or the other or a combination of both is the key to maximizing return on investment.

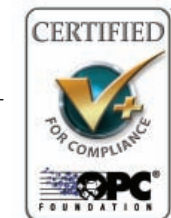

That's where Software Toolbox comes in with our products and expertise. We show you how to use our robust, cost-effective, off-the-shelf automation applications and development tools to reach your goals with the lowest risk and cost.

Our relationship with you includes our commitment to high standards and rigorous testing.

Software Toolbox is a Charter Member of the OPC Foundation. We are involved in every level of OPC Foundation product testing to insure reliable interoperability. In fact, several of our products have been awarded the *OPC Foundation Independent Lab Certification for Compliance*, a distinction of the highest level in our industry.

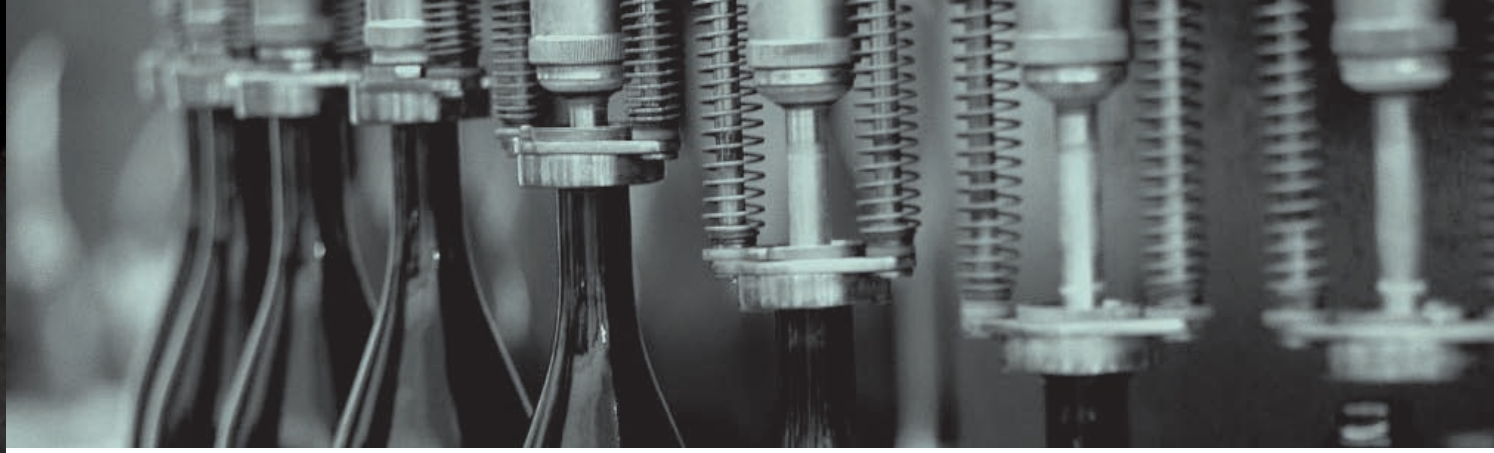

Software Toolbox stands behind our unique brand of proven products, comprehensive knowledge, and our committed team, supporting you every step of the way.

Put our products and experience to work for you.

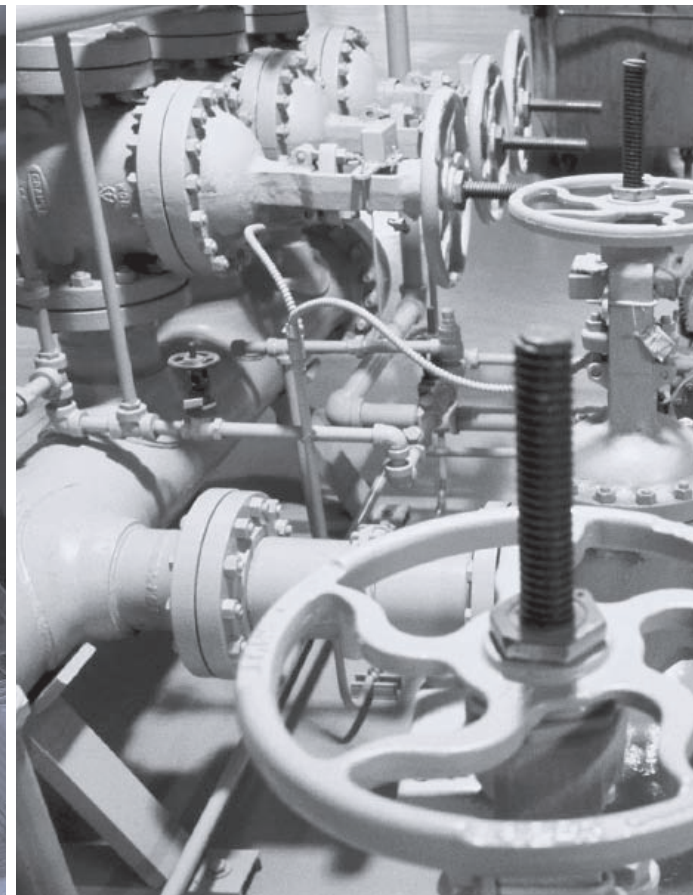

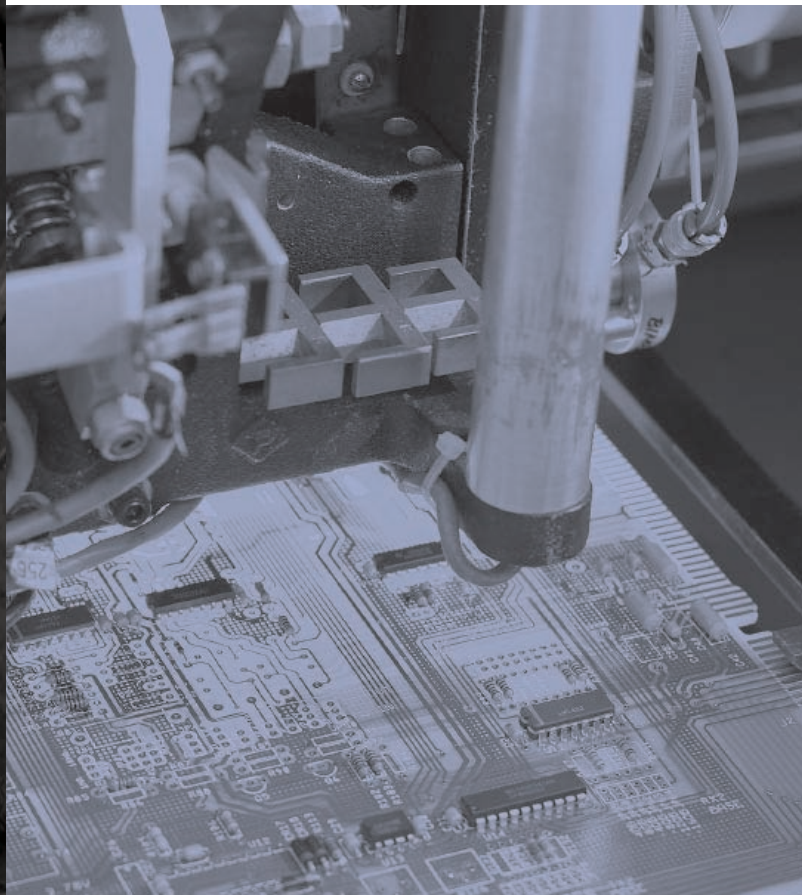

TYPES OF PRODUCTS

.NET Products	OPC Bridging and Tunneling	OPC Servers
Communications and Connectivity	ODBC and Database Connectivity	ActiveX Controls
Graphics Tools	OPC Data Integration and Collection Tools	Web Development Tools
HMI/SCADA Add-in Software	OPC Development Tools	S5/S7 Programming and Simulation

1

phone call

Your time is valuable. Our response time is critical.

It all starts with "What are you trying to accomplish?"

When you call Software Toolbox, a trained technical staff member answers the phone. Your call or email is addressed promptly, focusing on your goals, objectives, challenges, and concerns.

Minimizing your time investment and maximizing your results is achieved by providing help right away and through our always available online knowledge base and support systems.

Reaching the right person quickly and receiving the application support you need are just two of the many qualities which separate Software Toolbox from the pack.

Our technical team is available to consult for the duration of your projects—from conception to completion and beyond. Consult with us early and in all phases in your automation software projects to get the maximum value from your software license investments.

When you use products from Software Toolbox, you are investing in a relationship that delivers value through a commitment to excellence for the entire life cycle of your software investments.

Your time and patience working with us is greatly appreciated. You bring a whole new meaning to great customer service.
~Todd Wiese,
ProSoft Technology

Thanks for your help and support. I always give Software Toolbox the highest rating for support. One of the best products, companies, and support I have the opportunity to work with.
~Ray Makara, ESAB Welding & Cutting Products

Thanks again for all your help. I can't say enough about your company, it's nice to do business with people who are dedicated to their product and their customers.
~Bob Coomes,
Robert Bosch Corporation

You guys have the best tech support around. I really appreciate that you're there when I need you.
~Bill Jennings, Systems Performance Engineering

I am particularly appreciative of the prompt, professional level of work and expertise and advice that I receive from Software Toolbox and look forward to continuing to work with your team.
~Andrew Fenton, Ropak Mfg. Co., Inc

I want to tell you all at Software Toolbox how great your products are performing for us here. I'm already thinking of which site I'll use your products on next.
~Bob Mack, Steel Warehouse Company

100

percent commitment

Software Toolbox is a valued partner when you are away from shore.

Your success is our success.

We deliver quality off-the-shelf software products with the knowledge to support the implementation of solutions involving software from many suppliers.

We support your creation of custom business results using our products, whether you're integrating with an off-the-shelf automation software product or developing custom applications.

We respond to email and phone calls as trained technical professionals focused on helping you solve technical and commercial problems.

Our commitment helps you become even more competitive and grow your business consistently and profitably. Our international customer base in every industry values our unique approach, returning to Software Toolbox for help with a variety of automation software challenges.

Let our commitment work for you. Talk with us about your goals. We will save you time and resources. You will gain a trusted business partner and team member.

So, let's get started. What are you trying to accomplish?

We buy from Software Toolbox because we know when we need help, they always come through for us.

~Wright Sullivan, President, A&E Engineering

Once again Software Toolbox is incredibly responsive. You overcame a six hour time difference and worked with hardware from a supplier fifteen time zones away. You did what was needed to help us minimize our onsite startup time and have a profitable project. Your commitment to our business success brings us back to you time and again.

~Bob Rutemiller, President, Automation Consulting & Education
